8	1	1%	Cobble	8
9	0	0%	Boulder	9
10	0	0%	Bedrock	10
	177	100%	Total	158%

Note: 77% sand and silt, if done by volume it would be I estimate in excess of 90% sand and silt. The rhetorical question is that this material was removed from the creek. Is this a positive or negative thing for Big Chico Creek?
